PERUM BINTANG ALAM A4/14 RT: 036 RW: 011, KEC, TELUKJAMBE TIMUR, KAB. KARAWANG

Informatics Engineering graduate from Universitas Pasundan (2026, GPA 3.55/4.00) who builds web products end to end, from database design to a working interface used in daily operations. Two products have been delivered and are running: DuaPersen POS, a point-of-sale system used by a local coffee shop to replace manual transaction records, and Smart Research Environment (SRE) Writer at BRIN, a web-based academic writing platform where I built the AI Checker feature via GPTZero API integration. Strong in JavaScript (React, Next.js), PHP (Laravel), MySQL, REST API and authentication design, and Git-based collaboration. Also experienced in mentoring 180+ students as a Programming Laboratory Assistant and Web Programming Mentor, recognized with the Outstanding Lab Assistant Award from the Faculty of Engineering.

WORK EXPERIENCE

DuaPersen Street Coffee - **Karawang, Indonesia** Jul 2026 - Oct 2026

Full Stack Developer (Freelance)

DuaPersen Street Coffee is a local coffee shop in Karawang. Built a web-based Point of Sale (POS) system to replace their manual transaction records, covering order taking, menu and promo management, cashier shifts, and sales reporting.

- Designed and built a web-based Point of Sale (POS) application using Laravel and MySQL for daily store operations, covering transactions, menu items with product variants, promos, cashier shifts, and sales reports.
- Implemented two user roles (Owner and Cashier) with separate authentication methods (password for Owner, PIN for Cashier) plus an activity log as an audit trail.
- Built an operational dashboard and four types of sales reports with period filters, including PDF and Excel export.
- Worked directly with the business owner to translate operational needs into application features.

Badan Riset dan Inovasi Nasional - **Dago, Coblong, Kota Bandung, Jawa Barat, Indonesia** Jul 2025 - Sep 2025

Front-End Web Developer Intern

Smart Research Environment (SRE) Writer is a web-based academic writing platform developed at BRIN that helps researchers and students write, manage references and citations, and check their writing for AI-generated content in a single workspace.

- Developed and refined Smart Research Environment (SRE) Writer features on a web-based academic writing platform using Next.js and React, building the AI Checker feature through GPTZero API integration to detect AI-generated writing.
- Managed references and citations, optimizing the reference search with live search to deliver faster and more responsive results, and developed draft saving and recovery features to prevent data loss and improve user experience.
- Fixed bugs and improved the user interface, enhancing overall platform reliability and usability for academic writing workflows.

Universitas Pasundan - Web Programming Course - **Bandung, Indonesia** Jan 2025 - Mar 2025

Web Programming Mentor

Web Programming course focusing on modern web development technologies and frameworks, preparing students for web development industry careers.

- Entrusted by faculty as official mentor for Web Programming course, responsible for guiding 80+ students throughout their web development learning journey from basic concepts to advanced implementations
- Conducted comprehensive mentoring sessions covering web development fundamentals including HTML5, CSS3, JavaScript, PHP, MySQL, and modern framework integration
- Designed and implemented practical project-based learning approach resulting in 30% improvement in student engagement and hands on skill development

Universitas Pasundan - Faculty of Engineering - **Bandung, Indonesia** Oct 2024 - Oct 2025

Laboratory Assistant - Programming Practicum

Faculty providing quality education in informatics engineering and computer science, supporting hands-on experience for 200+ students annually.

- Served as Laboratory Assistant for Programming Practicum 1 and Programming Practicum 2 course, providing hands-on guidance to 100+ students in Java programming fundamentals and object-oriented programming concepts
- Conducted weekly lab sessions focusing on practical programming exercises, debugging techniques, and best practices in software development
- Developed comprehensive learning materials and practical exercises to enhance student understanding of core programming concepts including data structures, algorithms, and problem-solving methodologies
- Served as a teaching assistant and part of the instructional team, supporting the preparation and management of assignments,

quizzes, practical examinations, and final projects while providing constructive feedback.
- Guided students in debugging, applying software development best practices, and solving programming problems to strengthen their understanding of programming concepts and application development.
- Assisted students in identifying and resolving coding errors while providing guidance to develop their logical thinking, problem-solving abilities, and programming skills.

EDUCATION

Universitas Pasundan - **Bandung, Indonesia** Sep 2022 - Oct 2026

Bachelor of Informatics Engineering with specialization in Front-End Development and Software Engineering, 3.55/4.00

- Laboratory Assistant for Programming Practicum 1 course, successfully mentoring 100+ students in Java programming fundamentals with 95% satisfaction rate
- Web Programming Mentor recognized by faculty for outstanding guidance to 80+ students, improving pass rate by 25% through innovative teaching methodologies
- Top 33 of 5,000 participants Role Hacker - IndonesiaNext(Telkomsel)

ORGANIZATIONS AND PROJECTS

Dekompres – IndonesiaNext Hackathon by Telkomsel - **Indonesia** Jul 2026 - Aug 2026

Hacker (Full-Stack Developer) – Top 33 Finalist

IndonesiaNext is a national digital talent program by Telkomsel. Dekompres was built for its hackathon, competing among 5,000+ participants.

- Built Dekompres (dekompres.vercel.app), a structured journaling web app that helps university students identify their stress patterns through short daily entries.
- Integrated an LLM to convert each entry into structured data (dominant emotion, triggers, risk indicators), visualized in a dashboard with 7-day mood trends and weekly pattern summaries.
- Secured user data with per-account isolation via Row Level Security and kept LLM API keys server-side only.
- Pitched the product in the Top 33 to Top 24 round, placing among the Top 33 of 5,000+ participants.

PERMIKOMNAS(Pertemuan Himpunan Mahasiswa Teknik Informatika dan Komputer Nasional) - **Bandung, Indonesia** Jan 2025 - Jan 2026

Staff of Strategic Studies and Advocacy

PERMIKOMNAS (Pertemuan Himpunan Mahasiswa Teknik Informatika dan Komputer Nasional) is a national-level student organization that connects student associations from Informatics Engineering, Computer Science, and related fields across Indonesia. Its main goal is to foster collaboration, enhance student competencies, and encourage contributions in the fields of technology and computer science through activities such as national seminars, tech discussions, training programs, and community service initiatives.

- Actively involved in the Strategic Studies and Action division of the PERMIKOMNAS community, focusing on analyzing social and educational issues from a technological and student perspective
- Contributed to the development of advocacy content and organized awareness-driven events that engaged the student body in addressing key societal and academic issues
- Successfully facilitated inter-campus collaboration and amplified student voices through evidence-based studies and strategic actions, contributing to stronger student representation on national issues

SKILLS, AWARDS, TRAINING

- **Hard Skills**: PHP (Laravel, Livewire), JavaScript (React, Next.js), HTML5, CSS3 (TailwindCSS, Bootstrap), Python, MySQL (Database Design, Optimization), Git & GitHub, VS Code, Android Studio, Adobe Animate, Microsoft Office (Word, Excel, PowerPoint), .net(Beginner)
- **Soft Skills**: Leadership, Team Management, Active Communication, Problem Solving, Time Management, Adaptability, Critical Thinking, Teaching & Mentoring, Detail Oriented
- **Prestasi** (2024): Outstanding Lab Assistant Award from Faculty of Engineering for excellence in teaching and mentoring 100+ students with 95% satisfaction rate
- **Prestasi** (2024): Outstanding Web Programming Mentor recognition by faculty for innovative teaching methods and improving student engagement by 30%
- **Prestasi** (2025): Top 33 Finalist out of 5,000+ participants in IndonesiaNext by Telkomsel (Hacker role). Built and pitched Dekompres, a structured journaling web app that helps university students identify their stress patterns, using an LLM to turn short daily entries into structured data (emotions, triggers, risk indicators) and a dashboard that surfaces weekly mood trends and top stressors
- **Modules Taken Cloud Practitioner Essentials (Belajar Dasar AWS Cloud)** (2024): Completed a foundational-level course introducing core concepts of Amazon Web Services (AWS) cloud computing. Gained an understanding of cloud fundamentals
